

How to Talk to Your Child's Doctor

5 questions you should ask your child's doctor (but might not think to ask)

1. How is cancer affecting my child's health right now?
2. How quickly does my child need to start treatment?
3. Will cancer or its treatment affect my child's future fertility?
4. What fertility options are out there for children?
5. Is having children possible someday for my child after cancer?
